---

I am a Front End web developer with strong skills in designing and developing responsive web pages, focusing on optimization and speed. I also have experience in implementing Back End to Front End functionalities. My approach is user-centered, creating user-friendly and intuitive interfaces that enhance the user experience.

I am self-reliant in researching and selecting suitable libraries and frameworks, quickly adapting to the required technologies by the company. I am organized in task management and utilize the Scrum methodology for effective communication and meeting deadlines.
