I am a Front End web developer with strong skills in designing and developing responsive web pages, focusing on optimization and speed. I also have experience in implementing Front End functionalities. My approach is user-centered, creating user-friendly and intuitive interfaces that enhance the user experience.

I am self-reliant in researching and selecting suitable libraries and frameworks, quickly adapting to the required technologies by the company. I am organized in task management and utilize the Scrum methodology for effective communication and meeting deadlines.

TECHNOLOGIES

Javascript, Typescript, React, NextJs, Redux, Node.js, HTML, CSS, Express, Postgres, Sequelize, Stripe.

SOFT SKILLS

Leadership, adaptability, empathy, public speaking, open-mindedness, planning and organization, creativity, decision-making, teamwork, effective communication.

PROFESSIONAL EXPERIENCE

Noa Experience – Front end developer

October 2022 – Present

- Optimized layout and design, improving user experience and reducing loading time.
- Efficiently managed Git Flow for effective version control.
- Initiated new projects.
- Implemented Front End functionalities.
- Supported older projects within the company.

PROJECTS

Electa

January 2022 – June 2023

Noa Experience, Bogotá, Colombia.

- Initiated the project, managed the repository, implemented Git Flow, designed, developed, and implemented functionalities for a social media web application targeting followers of political candidates in Colombia. Features include registration (Google or Facebook), login, news panel, multimedia, surveys, referrals, profile editing, challenges, etc.
- Developed the app using Next.js with TypeScript and Tailwind CSS.
